

**REMARKS**

Applicant hereby elects Species II of Fig. 3. All claims including new claims 48-51 are readable thereon.

New claims 48-51 are specific to the situation wherein the wall that separates the disposal station from the dispenser station is defined by a part of the dispenser housing rather than by another structure, such as a part of a tissue cartridge for example.

Attention is also directed to the fact that there exists a CIP application Serial No. 10/071,902 filed February 8, 2002.

Respectfully submitted,

BURNS, DOANE, SWECKER & MATHIS, L.L.P.

Attachment to Amendment dated September 16, 2002  
Marked Copy: Claim 40 [ As Amended ]

40. (Amended) A method of providing tissues in a shower stall comprising the steps of:

- A) providing a tissue dispenser having a tissue dispenser station containing tissues to be dispensed, and a tissue disposal station for receiving used tissues, the tissue dispenser station [spaced] separated from the tissue disposal station by a wall and having a tissue dispensing orifice, the tissue disposal station having a tissue disposing orifice; and
- B) mounting the tissue dispenser at the shower stall above floor level.
